

Elke R. Börmann-El Kholy received her PhD in 1994 at Heinrich-Heine University Düsseldorf in the field of industrial biotechnology working on glutamic acid producing *Corynebacterium glutamicum*. Afterwards, she focused on teaching and students education and was acting as an external lecturer in the field of cell biology, general and medical microbiology at the University of Applied Sciences of Bonn-Rhein-Sieg. Since 2013, she has been working as the institute administrator at the Institute of Nano- and Biotechnologies (INB) and is mainly involved in the management of third-party funded projects and public relations.
